HOA (Homeowners Association) / Condo Association Database Software with Cloud Services Now Available!

Complete Commercial Database Software package for Managers of HOAs, Condo Association, Building and Property Management with Cloud enabled support for mobile devices and tablets brings professional association management to the digital era.

DB-PROS, Inc. Announces HOA (Homeowners Association) / Condo Association Database Software version 2.4 with Cloud Services Now Available!

BOSTON - **Feb. 5, 2015** - *PRLog* -- DB-Pros, Inc. is proud to announce the highly anticipated release of their popular database software program for HOA and Condo Association Management. **HOA** / **Condo Association Tracking Software™** version 2.4 *with Cloud Services* has been officially released and is available now for evaluation and purchase as of 2/5/15.

Combining a rich suite of features with a powerful and easy to use interface, **HOA / Condo Association Tracking Database Software™** version 2.4 leads a new generation of desktop applications that make use of both personal computing technology and the "**Cloud**". This translates to valuable real-time data available instantly to users of any and all internet-enabled hardware, such as **Android** mobile phones, **iPads**, **iPhones** as well as **PCs** and **Mac** computers.

HOA Database Management Software for Windows PCs and Cloud

Traditionally utilized by large **Fortune 500** corporations, affordable Cloud technology can now be harnessed by the neighborhood HOA to simplify and improve management of their organization's business operations. Cloud actuated economies of scale means system users now need only pay for the access and services they use.

With this new paradigm in computing technology, no longer are self-managed HOAs at a disadvantage to larger corporate enterprises. From maintaining up to date contact and billing information, to violation and notification management, to dues and financial accounting the **HOA** / **Condo Association Tracking Software™** system can be relied upon to bring professional association management to any HOA or property management entity.

The system's distributed database technology can be quickly adapted to fit nearly any HOA's needs, allowing access to Board members, Presidents and community members alike.
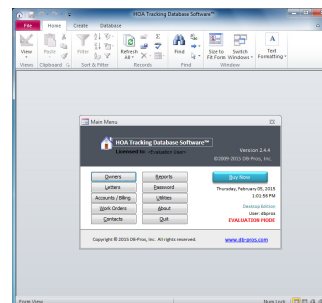

The database itself can handle from a dozen to hundreds or thousands of homeowner records, making quick work of important and routine tasks. The ability to generate traditional account statements and address label printing can be leveraged along with electronic communications such as email and .pdf files to bring a complete tool set to the HOA manager's repertoire.

With Cloud enabled services such as robust **Microsoft Windows** enterprise security and automated backups, HOA Boards can rest assured that their critical data is safe and secured.

HOA / **Condo Association Tracking Software™ version 2.4** is now available for download and purchase from our website at:
