"Features-at-a-Glance"

HR Tracking Database Software™ *for Windows PCs and Cloud*

Easy Installation
- Requires no advanced setup
- Single-user or network shared mode can be deployed *without* complex server configuration (no middle-ware)
- Includes MS Excel template for importing employee data into system

Flexible and Expandable
- System can handle from a dozen to thousands of employee records
- Add additional users at any time
- Designed by a proven database applications development team, using cutting-edge database technologies – fast, reliable and optimized for Microsoft Windows 7 / 10 and higher
- "Built to last" on proven Microsoft Access database engine platform – no need to worry about getting stuck on an obsolete technology

Employee Data Maintenance
- Maintain all aspects of employee or applicant's profile, including:
- Employee contact and emergency data
- Wage and Position history
- Employee benefits management
- Vacation and Personal time accounting
- Experience and qualifications data capture and querying
- On-boarding requirements management
- Full Training and Certification management with expiration reporting
- Disciplinary Action(s) records, Grievance data tab, Awards/Recognition history, and more…
- Store all essential HR documents in one place right in the employee's file
- System is completely data-driven and designed to dynamically fit your organization's structure – as well as expand as your business grows

Full Reporting and Exporting Capability
- Wide variety of reports built-in, from complete Employee profile to Expired Trainings/Certifications to Annual Birthday and Employment Anniversary reports
- All data can be outputted to Microsoft Excel .xls files for analysis or data crunching
- You decide what data is critical to your business's needs

Customizable
- Use MS Access Professional to query your proprietary data and create your own forms and reports
- **DB-Pros** expert custom development services always available at competitive rates

HR Tracking Database Software™ is scalable, affordable, high-performance, and you will never get locked into obsolete technology. See why HR Professionals around the world have made it their system of choice.
